

## Examples of Problem Framings

### Example 1

We will address the issue of poor condition of cattle during the dry season by developing affordable options for farmers to provide feed in the off season.

### Example 2

We will address the issue of poor condition of cattle during the dry season by establishing a system that will increase the availability of milk when the local production is reduced.

### Example 2

We will address the issue of poor condition of cattle during the dry season by developing methods that will improve the local foraging options during the dry season.
