Rajasthan Rainwater Harvest: Negative Tip

Negative tipping point: Logging the forest

- Less vegetation
  - More soil erosion
  - More sediment in johads
  - More labor required to maintain johads

- Less underground water
  - Less johad capacity

- Less water in wells
  - Less motivation, social institutions, technology for johads
  - Less irrigation water
    - Less agricultural work in village

Men migrate to cities. Less village labor to maintain johads
